Career Objective

Entry-level DevOps & Cloud Infrastructure Engineer with hands-on experience building automated CI/CD pipelines, securing containerized deployments, and provisioning highly available AWS infrastructure. Also proficient in Java full-stack development, with the ability to bridge application engineering and infrastructure automation to deliver reliable, production-ready systems.

Technical Skills

Languages:	Java, JavaScript, SQL
Core Java:	OOP, Exception Handling,
Backend:	Spring Boot, RESTful APIs, Hibernate, Spring Data JPA, JWT Authentication
Frontend:	React.js, HTML5, CSS3, JavaScript, Vite
Databases:	PostgreSQL, Oracle SQL
Tools:	Git, GitHub, Maven, Postman
Cloud:	AWS (EC2, S3, IAM, VPC, ALB, Auto Scaling Group)
DevOps:	Docker, Kubernetes, Jenkins
Infrastructure as Code:	Terraform, Ansible
Monitoring:	Prometheus, Grafana
Operating System:	Linux, Bash Scripting

Technical Projects

Linkly — Full-Stack URL Shortener & Analytics Platform [\[GitHub Repo\]](#)

Spring Boot, Spring Security, React Js, PostgreSQL, Hibernate (JPA), JWT, Gmail SMTP, RESTful APIs, Maven, Git

- Developed a secure full-stack URL Shortener platform using Java, Spring Boot, React.js, and PostgreSQL, enabling users to create, manage, and track shortened URLs.
- Implemented authentication and authorization with Spring Security and JWT, including email verification, password reset, and account recovery using Gmail SMTP.
- Designed and developed RESTful APIs with Spring Boot, Hibernate (JPA), and PostgreSQL for URL management, redirection, user management, and click analytics.
- Built a responsive React.js frontend with protected routes, analytics dashboard, and URL management features, following a modular architecture and Git-based version control.

Java Full-Stack Employee Management System [\[GitHub Repo\]](#)

Java, Spring Boot, React.js, PostgreSQL, RESTful APIs, Hibernate, Git, Postman

- Designed and developed a full-stack CRUD application for enterprise employee record management using Spring Boot and React.js.
- Developed modular RESTful APIs with Spring Boot and implemented ORM-based data persistence using Hibernate and PostgreSQL.
- Built a responsive React.js frontend with employee management features including create, update, delete, and search operations.
- Tested REST APIs using Postman and managed the complete source code using Git and GitHub version control.

DevSecOps CI/CD Pipeline & Observability — Boardgame Application [\[GitHub Repo\]](#)

Jenkins, GitHub, AWS EKS, Docker, Trivy, SonarQube, Nexus, Prometheus, Grafana

- Built an automated CI/CD pipeline using Jenkins encompassing comprehensive build, test, and deployment stages.
- Implemented shift-left security scanning with SonarQube and Trivy to catch code and container vulnerabilities before deployment.
- Built immutable multi-stage Docker images and managed artifact versioning through Nexus Repository and Docker Hub.
- Deployed a multi-container application on AWS EKS and set up live Prometheus and Grafana dashboards for real-time monitoring.

Education

Bachelor of Engineering, Electronics and Communication Engineering	Nov 2021 – May 2025
Adhiyamaan College of Engineering, Hosur	CGPA: 6.8 / 10

Certifications

- **Java Full Stack Development with DevOps Training** — JSpiders Training & Development Center, Bengaluru
